SC CURTAIN NETS

Woven cloths for display screens

In many exhibition halls the space above display stands is unattractive and something is needed to hide this from the view of visitors, either by covering the whole ceiling or breaking up the unsightliness.

At the same time the water from fire sprinklers must not be impeded should a fire break out.

SC CURTAIN NETS provide the answer.

SC CURTAIN NETS are a range of nets especially designed for use at trade fairs and exhibitions, sports halls (e.g. swimming pools, indoor athletic stadiums, gymnasiums, etc.) and for use as decoration material for displays.

SC CURTAIN NETS are fireproofed to B1 standards (DIN 4102 certified) and conform to the VdS norm for sprinkler nets. If a fire breaks out, **SC CURTAIN NETS** will not impede the flow of water from overhead sprinklers.

SC CURTAIN NETS are:

- Washable
- Light but strong
- Easy to assemble and dismantle
- 100% recyclable

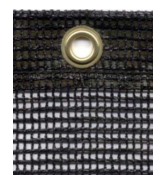

SC CURTAIN NETS can be printed with company logos, etc. (due to the mesh size only larger motifs can be printed).

SC CURTAIN NETS are available in white, black, grey and silver.

SC CURTAIN NETS are available in rolls or cut to the shape and dimensions required by the customer.

Cut pieces can be supplied with borders reinforced by a PVC band and with metal eyelets every 50 cm.

TECHNICAL DATA

Type	SC0214/B1	
Polymer	HDPE	
Weight	105 g/m ²	150 g/m ²
Colours	Black, White, Grey	Silver
Shading Factor	34% - 54% depending on colour	
B1 fire retardant	YES	

For quick, easy and secure mounting of SC

SPANQUICK
Elastic cables

Available in black
or white
